

Texts

We will be using *Calculus*, Fourth Edition, by Jon Rogawski, Colin Adams, and Robert Franzosa as our textbook.

Course Web Page

Off of buzzard.ups.edu/courses.html you can find the link to the [course web page](#).

Office Hours

My office is in Thompson 303. Making appointments or simple, **non-mathematical** questions can be handled via email — my address is beezer@ups.edu. I rarely do not receive your email, and I read all of my email all of the time, usually very shortly after receiving it. Urgency of replying varies by the hour, day, and nature of the message. Office Hours are 9:00–10:50 on Monday and Friday, 9:30–10:50 on Tuesday and Thursday. Office Hours are first-come, first-served, so I do not make appointments for these times, nor do you need to ask me if I will be present at these times. You may assume I will be there, unless I have announced otherwise in class or by email. You **may** make an appointment for other times, or just drop by my office to see if I am in. Office Hours are your opportunity to receive extra help or clarification on material from class, or to discuss any other aspect of the course.

Class Preparation

I expect that you will have read the relevant section of the textbook **prior** to class. You can see on the calendar which section we will be discussing each day, so there is no uncertainty about the day's topics. To this end, there will a few of the easier WeBWorK exercises included in each set related to the reading.

Practice

We will work problems in WeBWorK, an online system. These will be due at 6:00 AM on the mornings **when we are scheduled to begin the next section**. I will demonstrate the system in class and you can find a link on the course page. Your total percentage correct for each of four intervals (prior to each exam) will be equally weighted to form your score on this part of the course. These problems cannot be accepted late.

It is your responsibility to be certain that you are learning from the homework exercises. The best ways to do this are to work the problems diligently, start studying them early, and participate in classroom discussions. If at this point you are still unsure about a problem, then a visit to my office is in order, since you are obviously not prepared for the examination

questions. Making a consistent effort outside of the classroom is the easiest way (only way?) to do well in this course.

Mathematics not only demands straight thinking, it grants the student the satisfaction of knowing when he [or she] is thinking straight.

—D. Jackson

Mathematics is not a spectator sport.

—Anonymous

I hear, I forget. I see, I remember. I do, I understand.

—Chinese Proverb

An education is not received. It is achieved.

—Anonymous

WeBWorK information:

- Your username is the **first part** of your UPS email address—everything up to, but not including, the @ character.
- Your **initial** password is your UPS ID number (7 digits, starts with a 5).
- It should be obvious where/how to change your password and other settings.
- Please change your password, so your work is secure, and record it somewhere so you do not have to ask me to reset it.
- The **Preview** button just lets you check that what you typed as an answer is what you meant, without it being recorded as an attempt. Use **Submit** to have your answer checked.
- Generally, you have an unlimited number of attempts on a problem.
- The numbers on the problems will correspond to the Second Edition of the text, not the Fourth Edition.
- There is an “Orientation” problem set waiting for you!

Examinations

There will be four 50-minute timed exams—they are all listed on the **tentative** schedule. There will be a comprehensive final exam on wednesday, December 15 at Noon. The final exam cannot be given at any other time and also be aware that I may allow you to work longer on the final exam than just the two-hour scheduled block of time. In other words, ***plan your travel arrangements accordingly.***

Come to examinations prepared to remain in the room for the entire length of the exam. Power off any electronic devices (this includes phones).

Grades

Grades will be based on the following breakdown:

- Examinations: 50%
- WeBWorK Questions: 25%
- Final Examination: 25%

Attendance and improvement will be considered for borderline grades. Scores will be posted anonymously on the web at a link off the course page.

Academic Policy Reminders

Here are three reminders about important academic policies which are described thoroughly in the “Academic Policies” section of the *University Bulletin*. The [online version](#) is off of

www.pugetsound.edu/academics/academic-resources/university-bulletins/

or a printed copy may be requested from the Registrar’s Office (basement of Jones Hall).

- *Registration for Courses of Instruction, Non-Attendance.*
“Regular class attendance is expected of all students. Absence from class for any reason does not excuse the student from completing all course assignments and requirements.”
- *Grade Information and Policy, Withdrawal Grades.*
Withdrawal grades are often misunderstood. A Withdrawal grade (W) can only be given prior to the university deadline listed on our course schedule, and after that time (barring unusual circumstances), the appropriate grade is a Withdrawal Failing (WF), **even if your work has been of passing quality**. See the attached schedule for the last day to drop with an automatic ‘W’.
- *Academic Integrity.*
All of your graded work is expected to be *entirely* your own work, this includes Reading Questions and Writing Exercises. Anything to the contrary is a violation of the university’s comprehensive policy on Academic Integrity (cheating and plagiarism). Discovered incidents will be handled strictly, in accordance with this policy. Penalties can include failing the course and range up to being expelled from the university.

Purpose

One of the goals of your college education is to progress to becoming an independent scholar. To this end, you will be given a great deal of freedom in how you choose to learn calculus. Of course, with freedom comes responsibility. Read the book before the lectures, work the exercises diligently, tidy up your class notes each evening, and ask questions. Arriving late to class, or having conversations with others during class, not only disrupts your peers, but tells me you are not serious about your education. Our class is small enough that I will

notice when you are not here, and again this will be another way that you signal me about your commitment to the endeavor.

Calculus is one of the most amazing intellectual developments of the past several hundred years and is responsible in large part for many of the advances in science, technology and engineering that we take for granted today. Your commitment to this course will be rewarded, and your inattention will be a waste of your tuition and a waste of your time.

Conduct

Daily attendance is required, expected, and overall a pretty good idea. Class will begin on-time, so be here, settled-in and ready to go. In other words, walking in the door at the exact time class is to begin is not considered arriving on-time. Repeated tardiness and absences will result in grade penalties, in accordance with university policies. Do not leave class during the lecture unless your continued presence would be a greater interruption—fill your water bottles, use the toilet, and so on, **in advance**. Mask-wearing is required at all times. Do not bring food or drink since you would need to remove your mask to consume it. Please keep phones in your pocket or bag, unless you are using them to read course material. In short, we are here to learn and discuss mathematics together. It is your responsibility to not distract your peers who are serious about their education or distract me as I endeavor to make the best use of the class time for you and your colleagues.

University Notices

These are multiple notices the university administration requests we duplicate for you.

- *Classroom Emergency Response Guidance.*

Please review university emergency preparedness, response procedures and a training video posted at www.pugetsound.edu/emergency/. There is a link on the university home page. Familiarize yourself with hall exit doors and the designated gathering area for your class and laboratory buildings.

If building evacuation becomes necessary (e.g. earthquake), meet your instructor at the designated gathering area so she/he can account for your presence. Then wait for further instructions. Do not return to the building or classroom until advised by a university emergency response representative.

If confronted by an act of violence, be prepared to make quick decisions to protect your safety. Flee the area by running away from the source of danger if you can safely do so. If this is not possible, shelter in place by securing classroom or lab doors and windows, closing blinds, and turning off room lights. Lie on the floor out of sight and away from windows and doors. Place cell phones or pagers on vibrate so that you can receive messages quietly. Wait for further instructions.

- *Student Religious Accommodation.*

The university provides reasonable religious accommodations for academic courses and programs, and the university policy is found at [this location](#)¹. If you need a reasonable

¹www.pugetsound.edu/about/offices-services/human-resources/policies/campus-policies/student-religious-accommodations-in-academic-courses-or-programs

accommodation due to a religious holiday or organized religious activity, you must give me written notice within the first two weeks of class so that we can coordinate the accommodation. If you have questions about the policy, you may contact the University Chaplain. If you have a grievance about the application of the policy or the handling of your request for an accommodation, you may contact the Dean of the Faculty.

Learning Outcomes

The University Curriculum Committee and accrediting agencies expect to see a list of learning outcomes.

- Understand a definite integral as a sum of a varying quantity.
- Understand a definite integral as a the net change of a rate of change.
- Become proficient at techniques for finding antiderivatives, including differential equations.
- Appreciate applications of integration.
- Understand infinite series as an infinite sum.

Please review these at the **end** of the semester when they will be easier to understand.

Tentative Daily Schedule

Monday	Tuesday	Thursday	Friday
Aug 30 Syllabus WeBWorK Section 5.1	Aug 31 Section 5.2	Sep 2 Section 5.3	Sep 3 Section 5.4/5.5
Sep 6 Labor Day Holiday	Sep 7 Section 5.6	Sep 9 Section 5.7/5.8	Sep 10 Section 6.1
Sep 13 Section 6.2 Drop w/o Record	Sep 14 Section 6.3	Sep 16 Section 6.4	Sep 17 Section 6.5
Sep 20 Review	Sep 21 Exam 1 Chapters 5, 6	Sep 23 Section 7.1	Sep 24 Section 7.1
Sep 27 Section 7.2	Sep 28 Section 7.2	Sep 30 Section 7.3	Oct 1 Section 7.3
Oct 4 Section 7.4	Oct 5 Section 7.5	Oct 7 Section 7.7	Oct 8 Section 7.8
Oct 11 Section 7.8	Oct 12 Review	Oct 14 Exam 2 Chapter 7	Oct 15 Section 10.1

Mid-Term

Tentative Daily Schedule

Monday	Tuesday	Thursday	Friday
Oct 18 Fall Break	Oct 19 Fall Break	Oct 21 Section 10.1/10.2	Oct 22 Section 10.2
Oct 35 Section 10.3	Oct 26 Section 10.3/10.4	Oct 28 Section 10.4	Oct 29 Section 10.5
Nov 1 Section 10.6	Nov 2 Section 10.7	Nov 4 Section 10.7/10.8	Nov 5 Section 10.8 Last Day for Automatic W
Nov 8 Review	Nov 9 Exam 3 Chapter 10	Nov 11 Section 8.1	Nov 12 Section 8.1/8.2
Nov 16 Section 8.2	Nov 17 Section 9.1	Nov 19 Section 9.1/9.2	Nov 20 Section 9.2
Nov 22 Section 9.3	Nov 23 Section 9.4	Nov 25 Thanksgiving	Nov 26 Thanksgiving
Nov 29 Section 11.1	Nov 30 Section 11.1/11.2	Dec 2 Section 11.2	Dec 3 Review
Dec 6 Exam 4 Chapter 8, 9, 11	Dec 7 Housekeeping	Dec 9 Reading Period	Dec 10 Reading Period

Final Examination: Wednesday, December 15 at Noon
